22 1801-0	Compact storage module with 9 shelves, shelf lock	D=1206 W=900 H=1550mm

We take safety seriously
Pull-out units should be bolted to the floor
or fitted within the pallet racking in such a way
that they can't tip over. If that's not suitable then we
have a special shelf locking system (designed in-
house) which only allows one shelf at a time to be
pulled out, and so prevents tipping. If you want to
move the unit around a lot, we recommend a trans-
port lock which locks all the shelves in place.
Compact storage module 100%

Pull-out shelves extend all the way out. Each shelf takes 150kg.
